

Topic :- Getting Started with COM-SUR

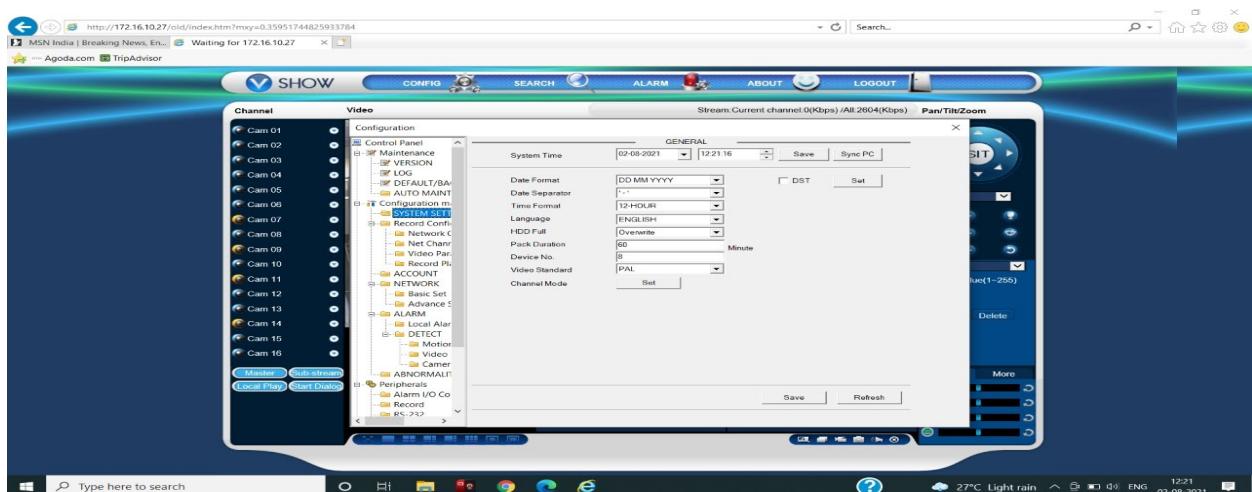

AIM :- To verify the live capturing quality of Com-Sur with different streams and resolutions.

Steps to be followed

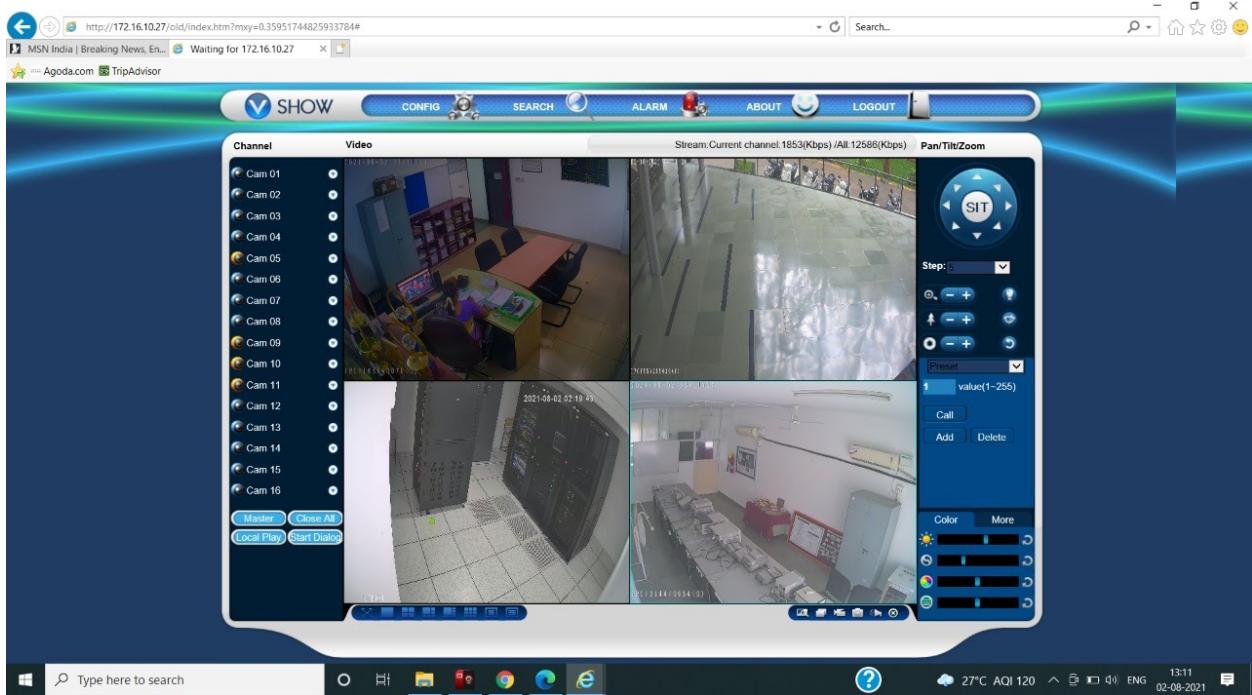

Step 1 : To connect with the LAN network of RVCE campus using IP address 172.16.10.27 through internet explorer.

Step 2 : Once we are connected to the above network we will get a website where we need to enter the login credentials to get the login access of RVCE surveillance cameras.

Step 3 : After successful login we will get an interface called V-Show which gives the live stream and allows us to select the different streams and resolutions.

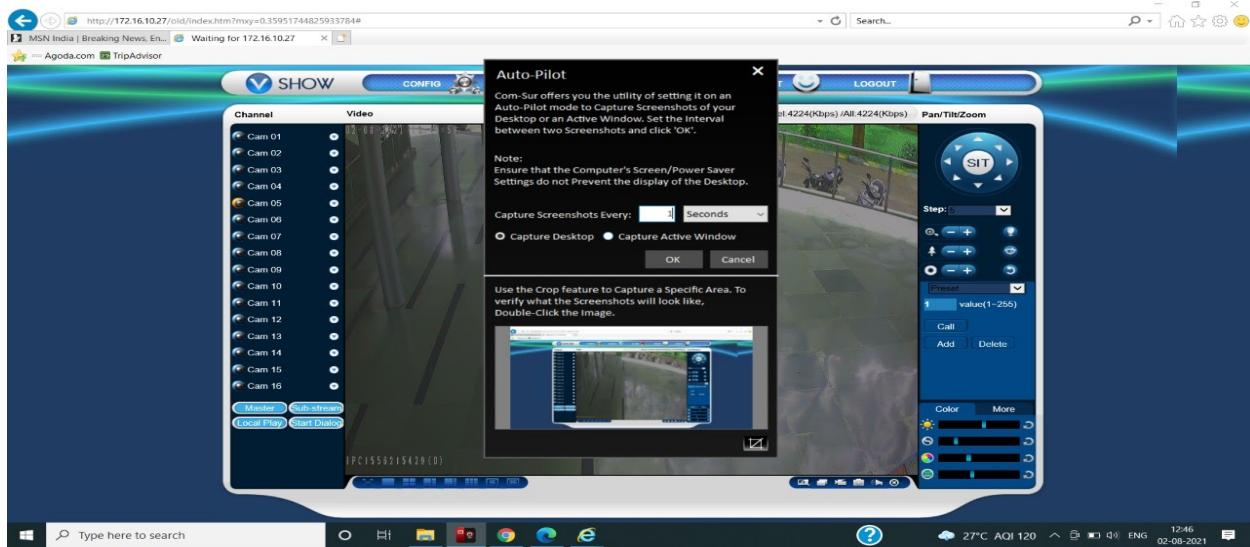

Step 4 : Once we select the configuration we will get the view as shown in the below figure.

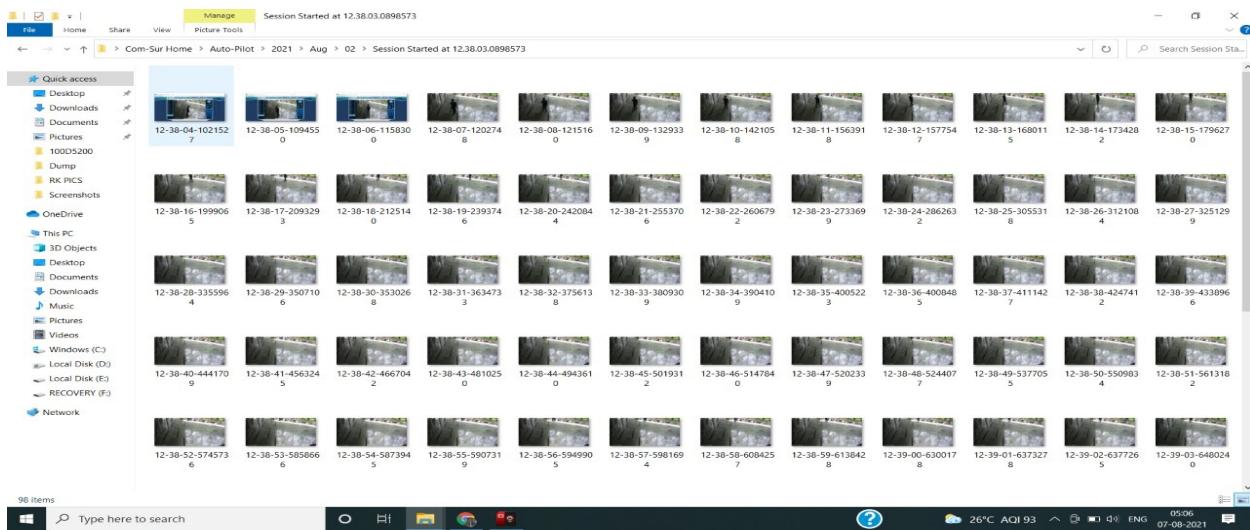

Step 5 : After selecting the high resolution with one video stream at a time we need to open the Com-Sur software and select the option called “ Capture ”.

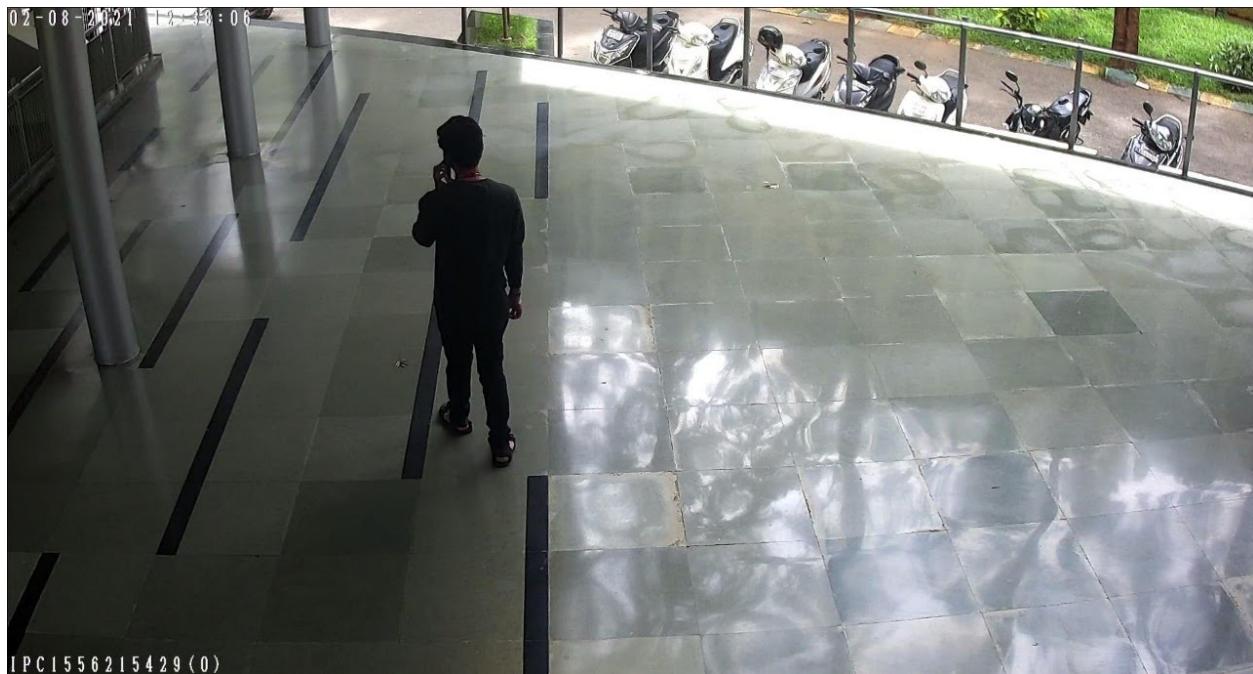

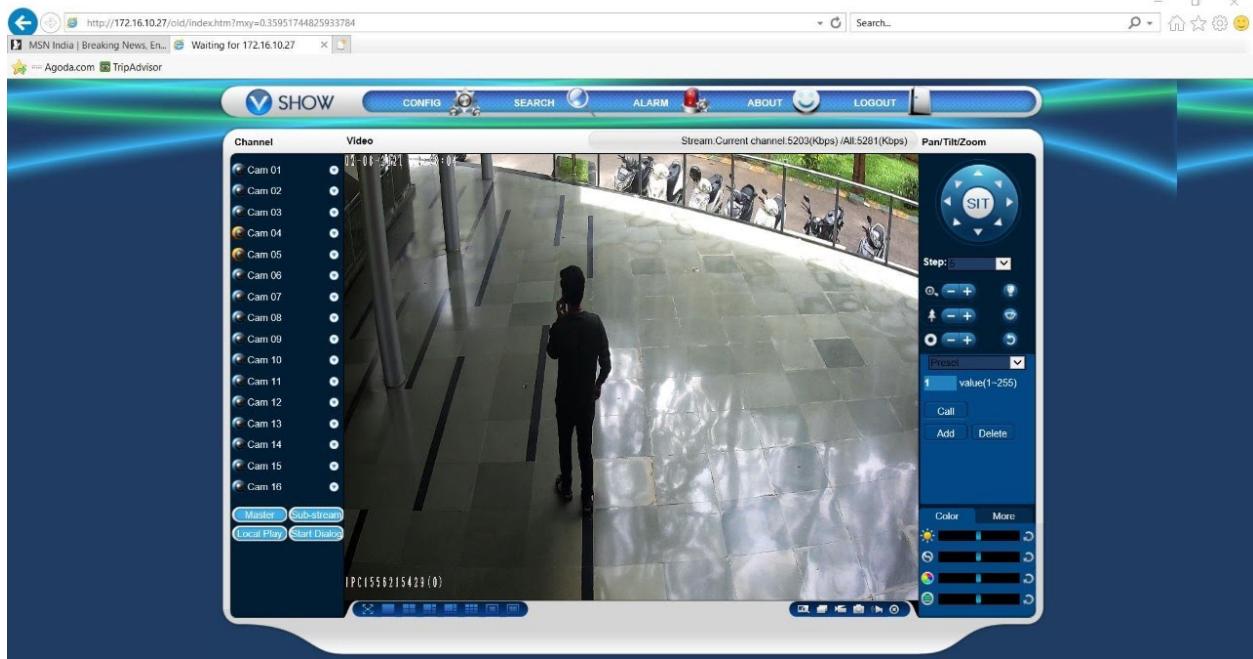

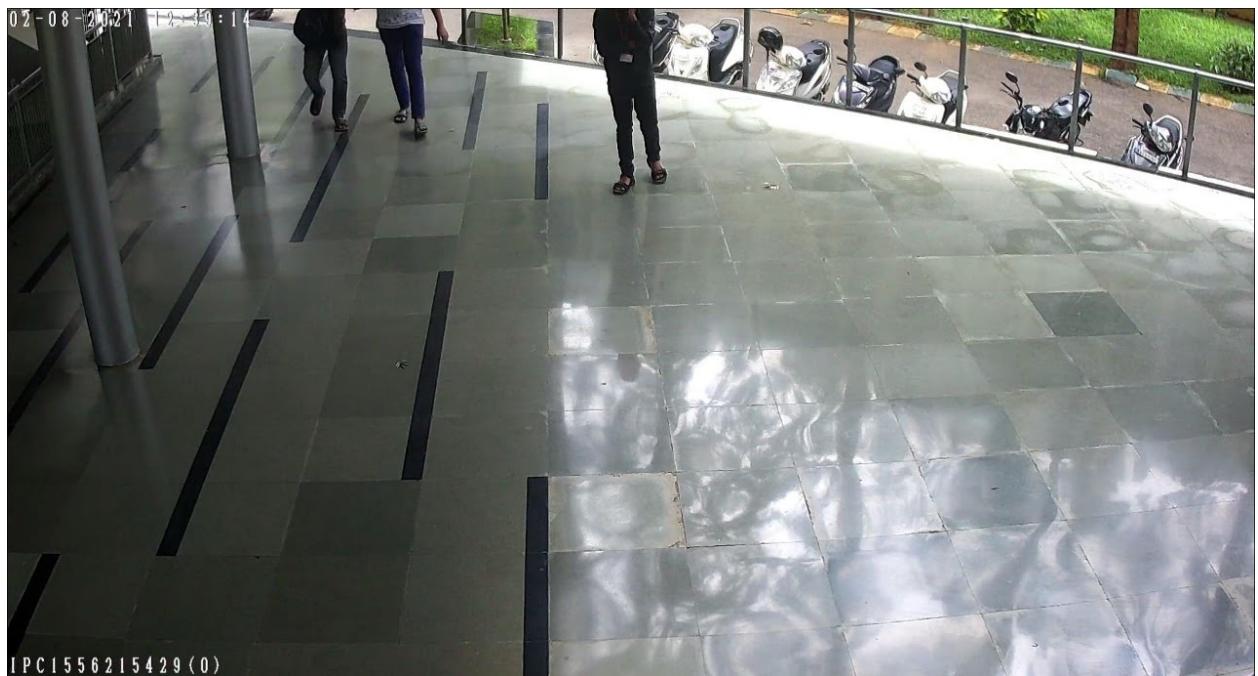

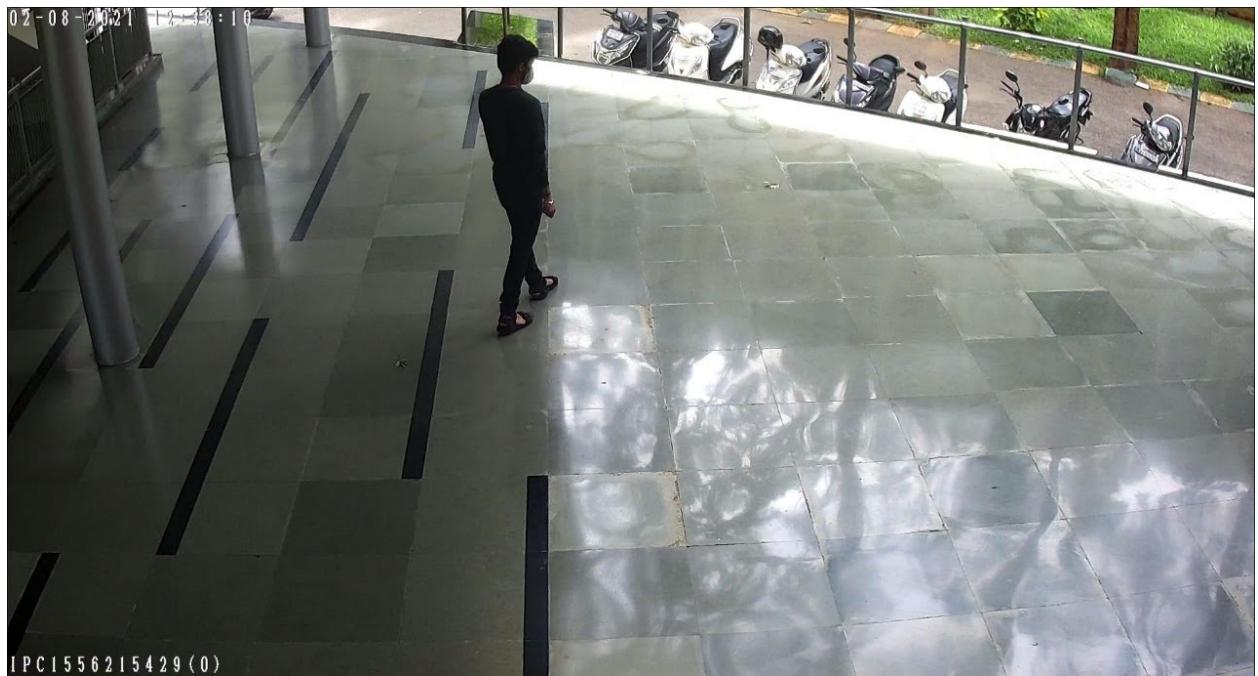

Step 6 : Once we select the capture option then we need to select advanced live capture with “**Auto-Pilot mode**” and also we need to select the number of screen shots per second.

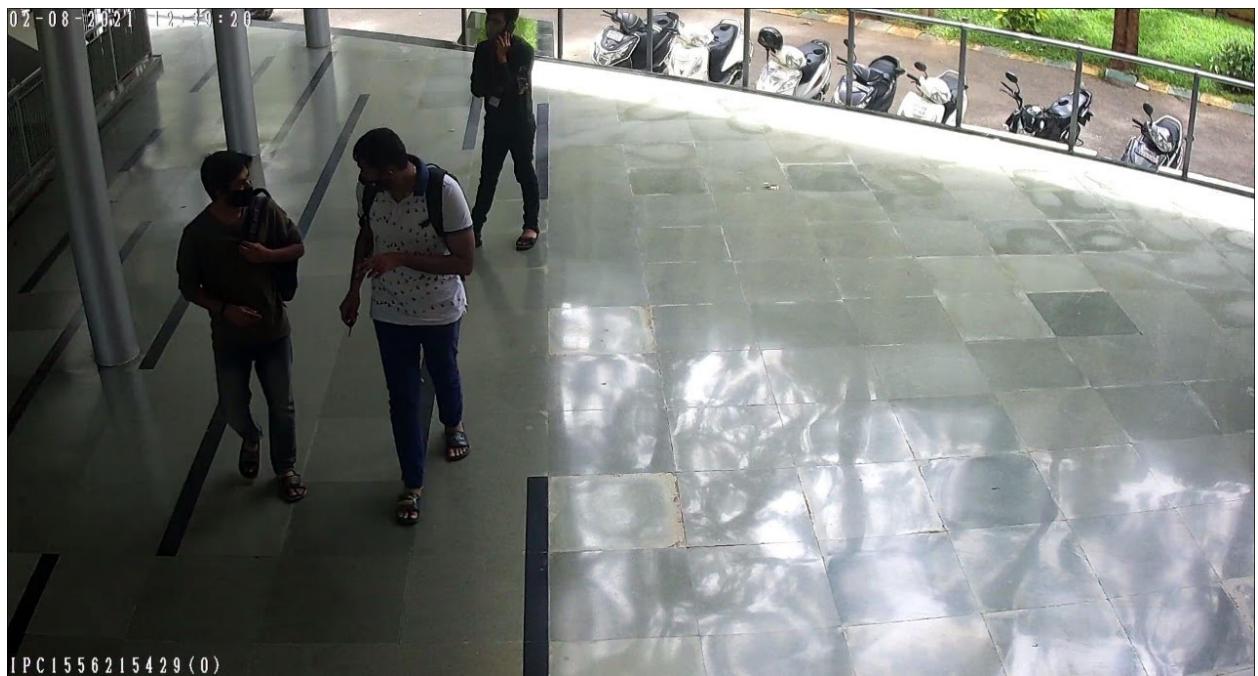

Step 7 : Once Com-Sur starts capturing it will create a separate folder with the current date and time as name and store the screenshot as shown in the below figure.

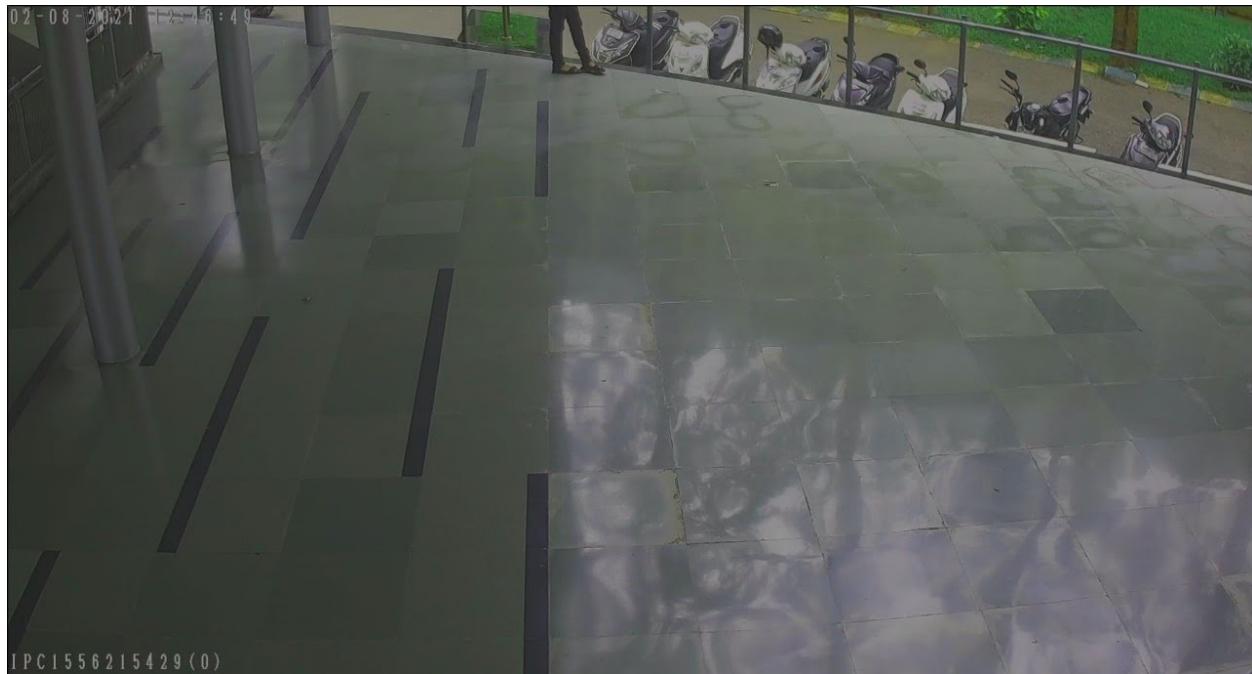

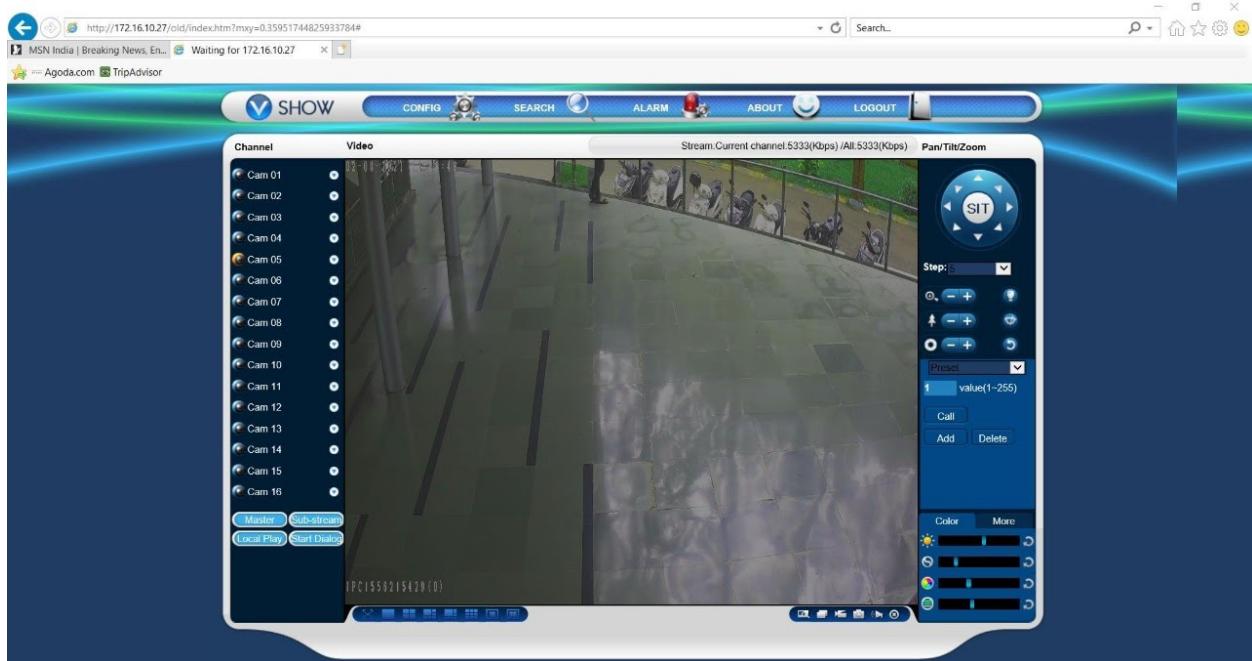

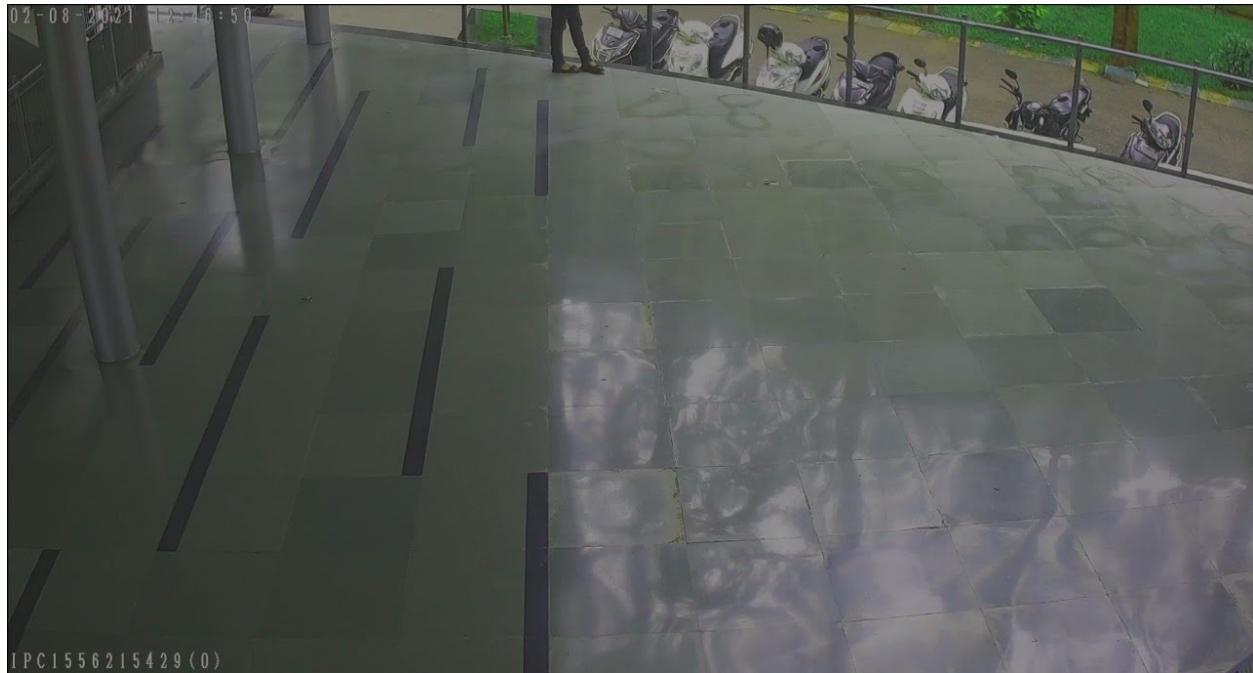

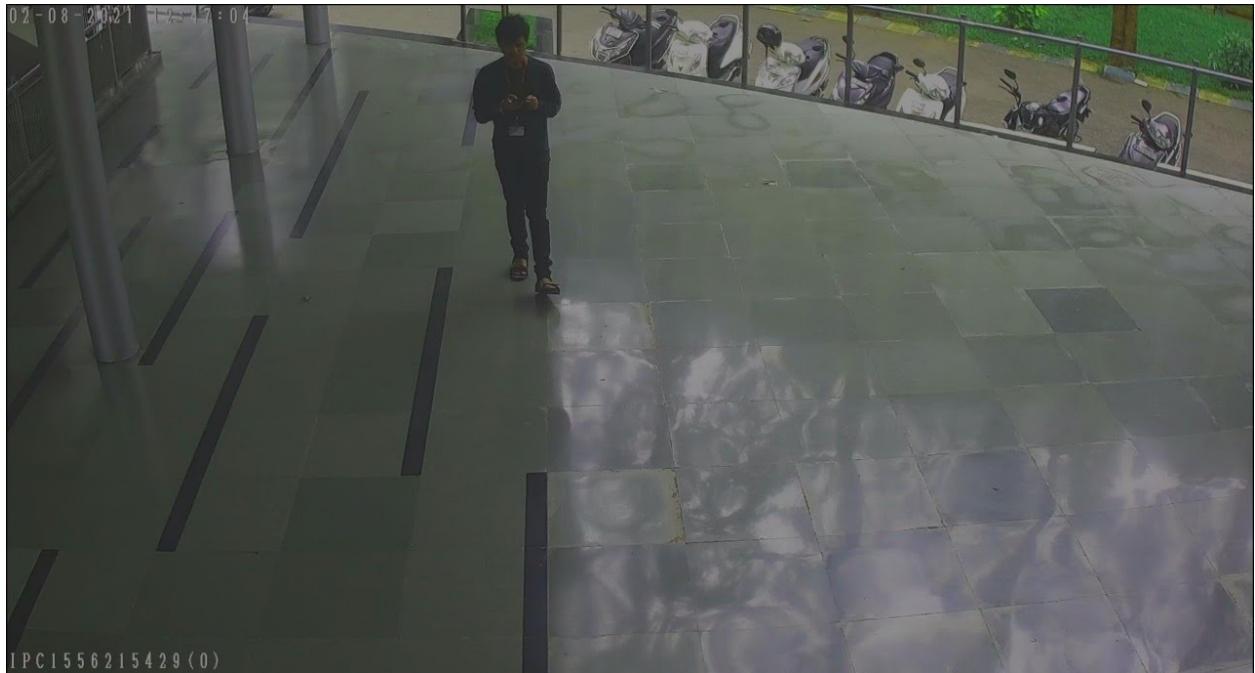

Step 8 : Repeat Step 7 by Selecting low resolution with one stream at a time.

Step 9 : Repeat Step 7 by selecting high resolution with two streams at a time.

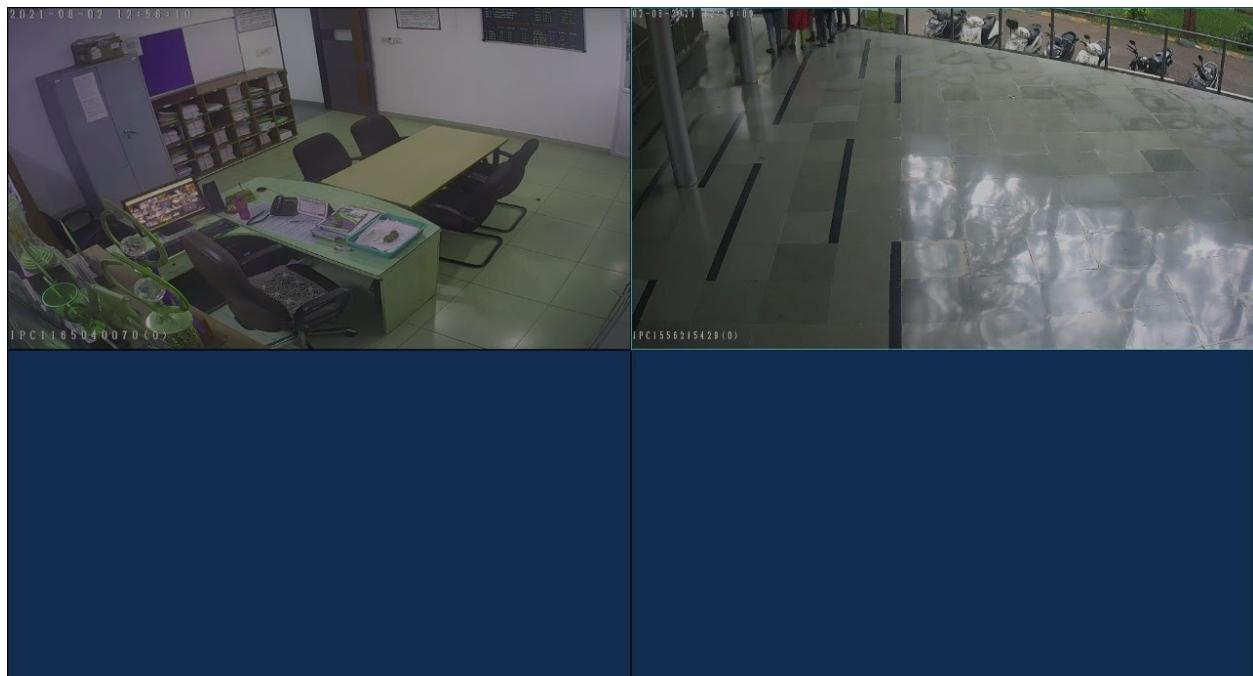

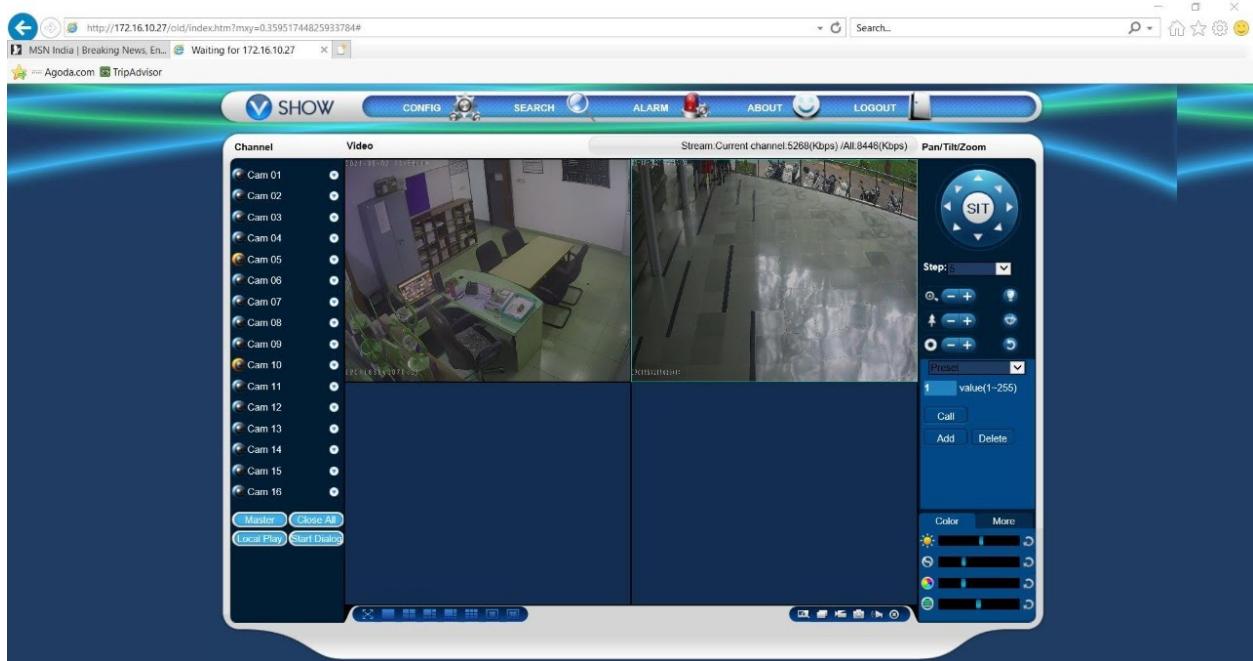

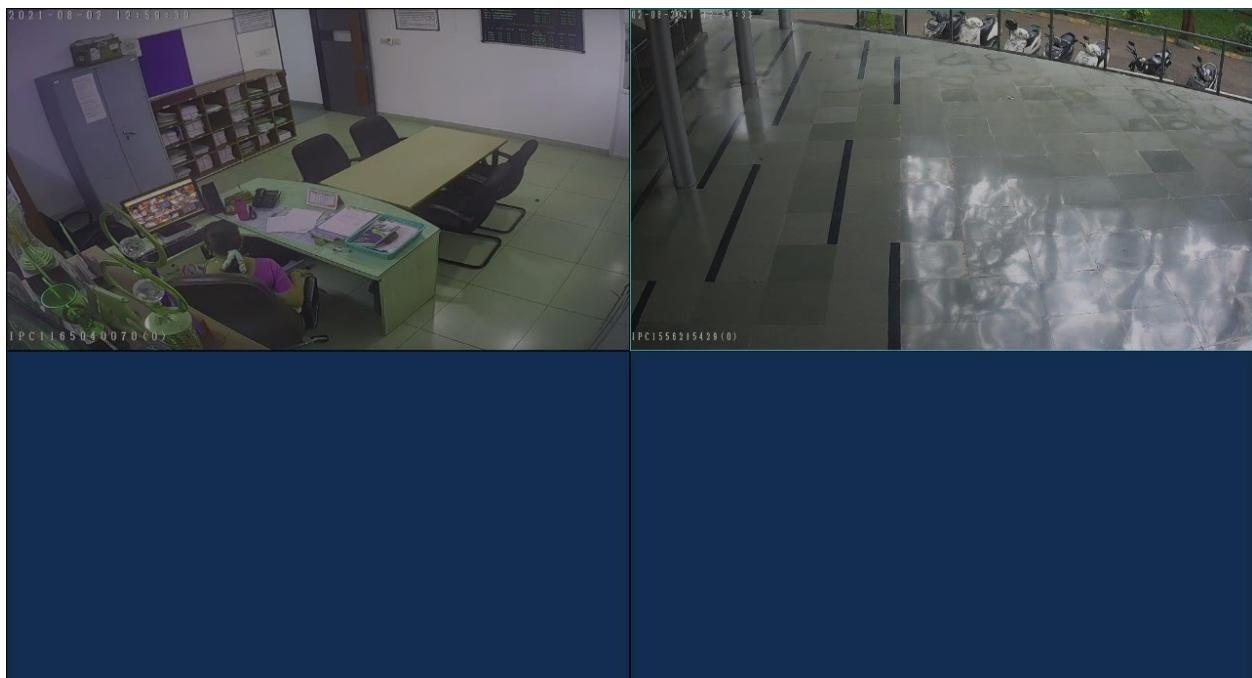

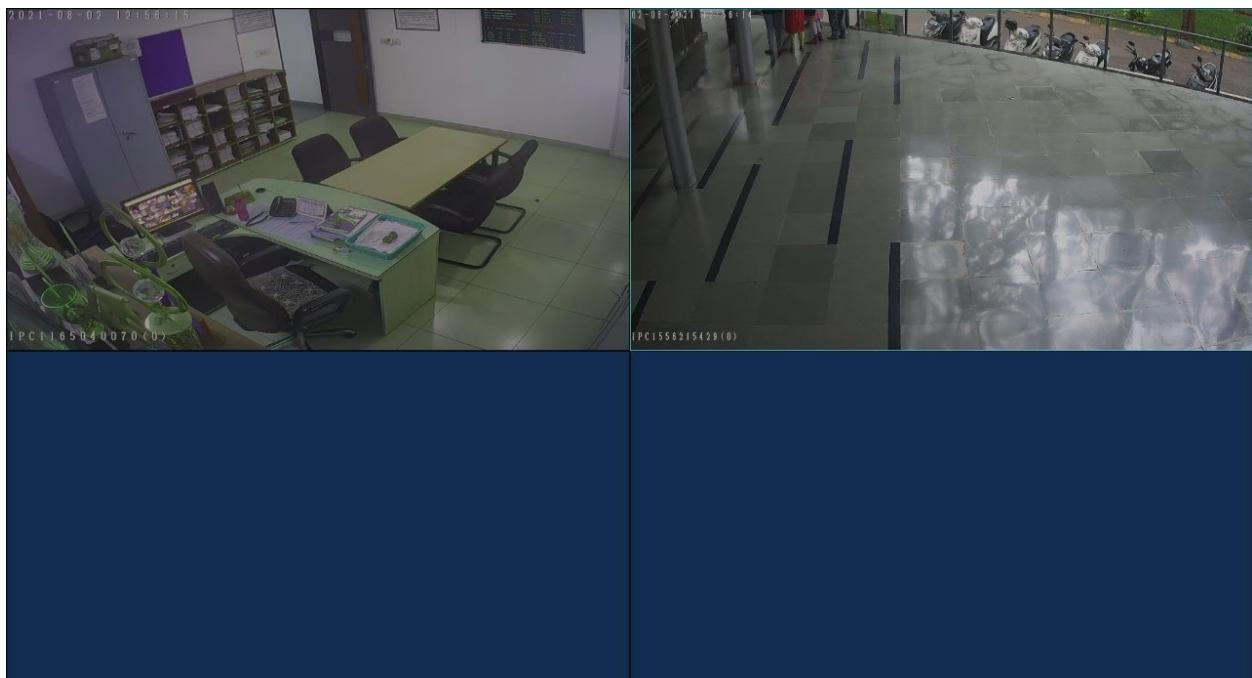

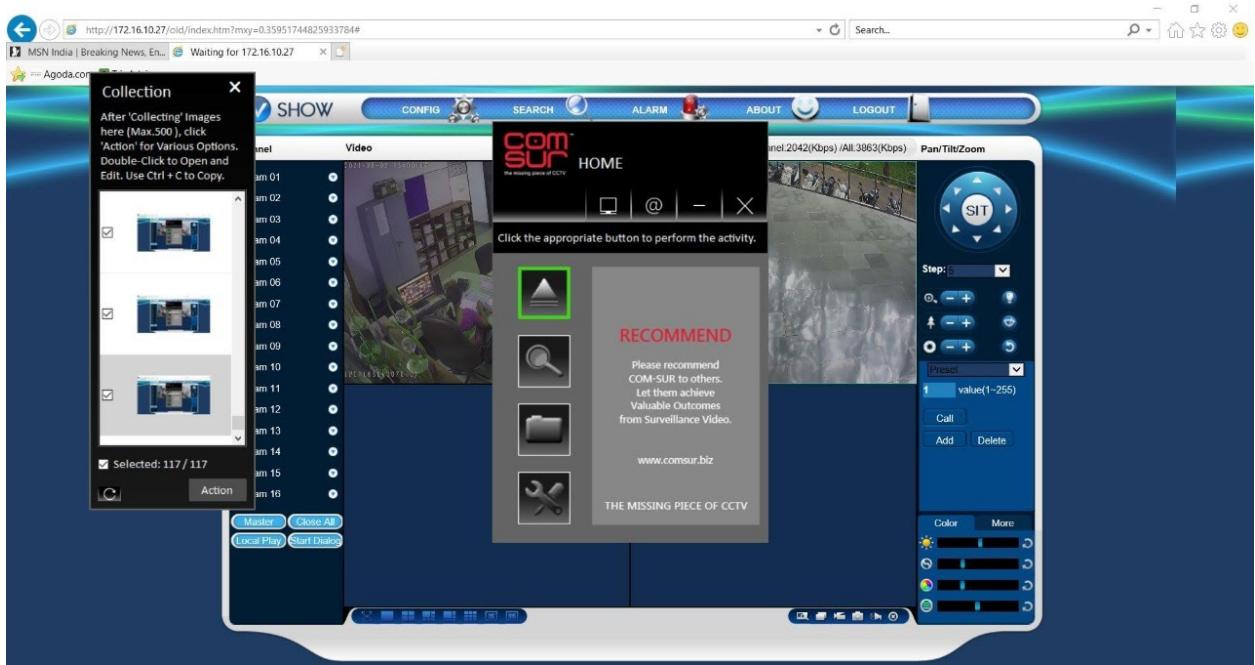

A screenshot of a surveillance software interface titled "com-sur HOME". The interface has a dark blue theme with a navigation bar at the top featuring "SHOW", "CONFIG", "SEARCH", "ALARM", "ABOUT", and "LOGOUT". On the left, there is a vertical list of "Channel" names from "Cam 01" to "Cam 16", each with a circular icon. Below this list are three buttons: "Monitor", "Close All", and "Local Play". In the center, there is a main video preview window showing a view of a room with a table and some equipment. To the right of the preview window, there is a "RECOMMEND" section with text and icons. Further to the right is a "Pan/Tilt/Zoom" control panel with a circular dial and various buttons. At the bottom, there are additional controls for "Color" and "More". The URL "http://172.16.10.27/old/index.htm?mxy=0.35951744825933784#/" is visible in the browser's address bar.

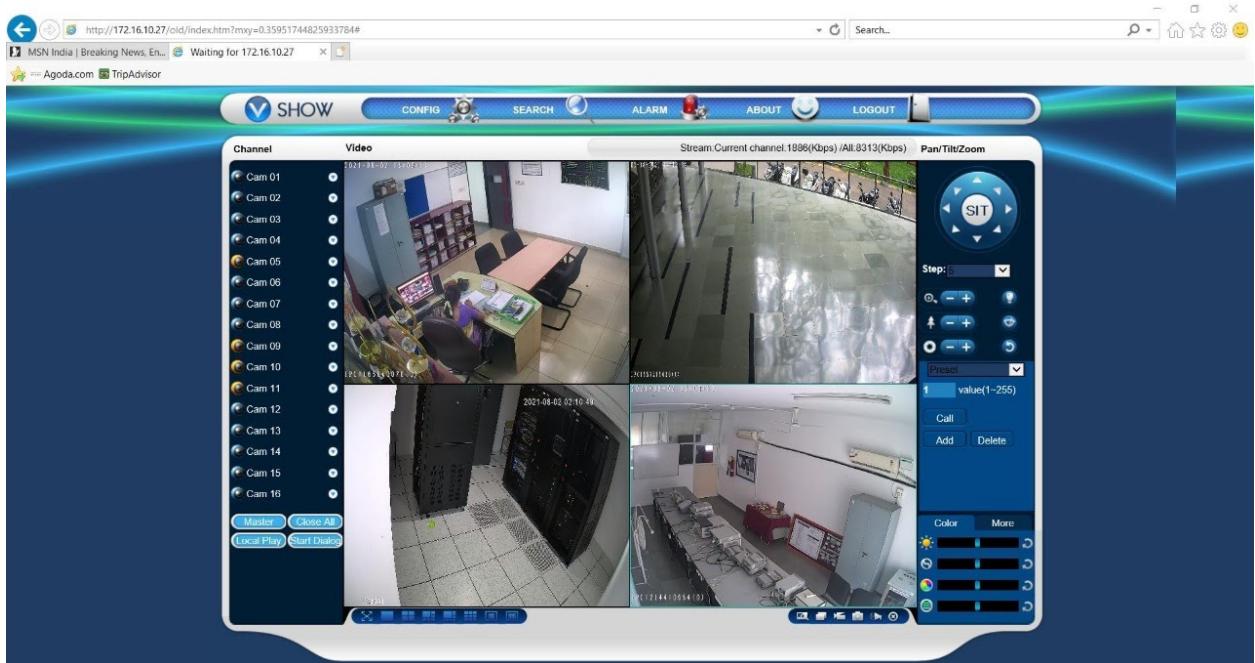

Step 10 : Repeat Step 7 by selecting low resolution with two streams at a time.

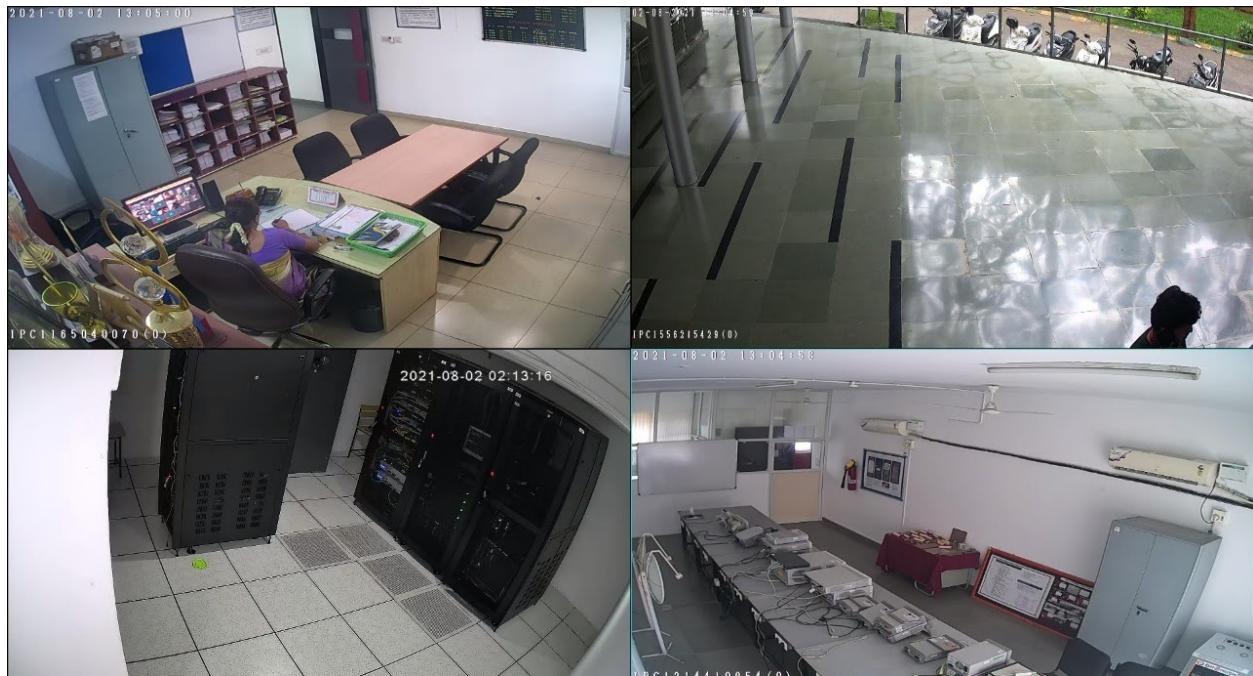

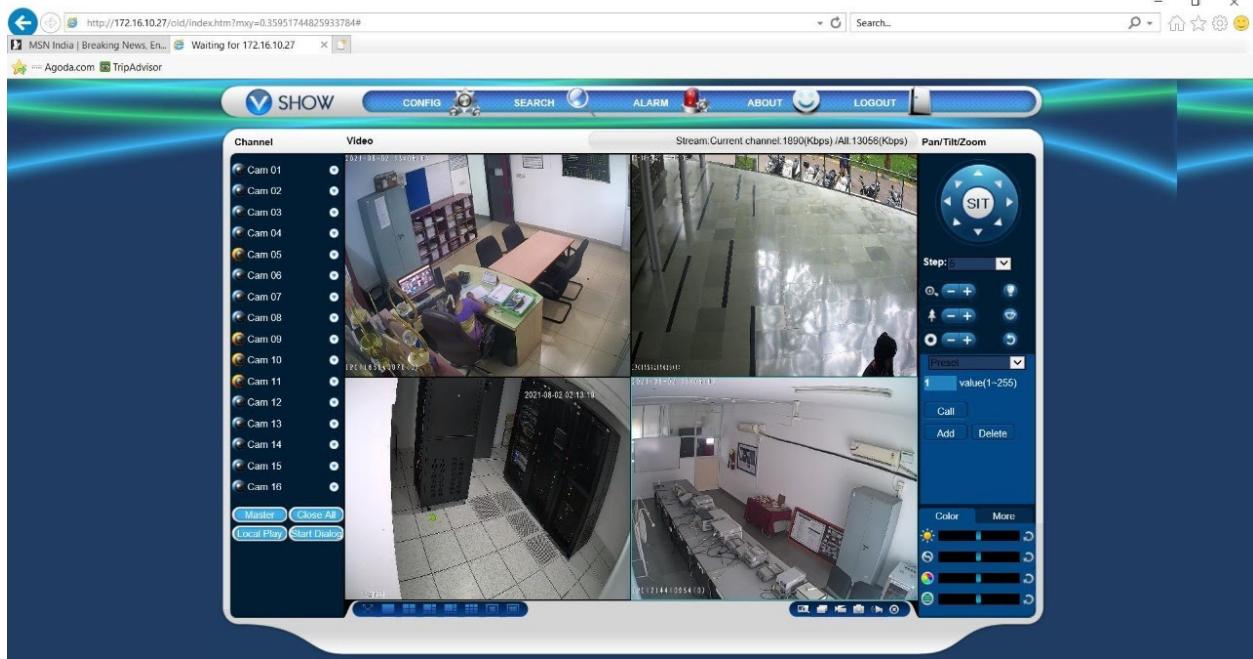

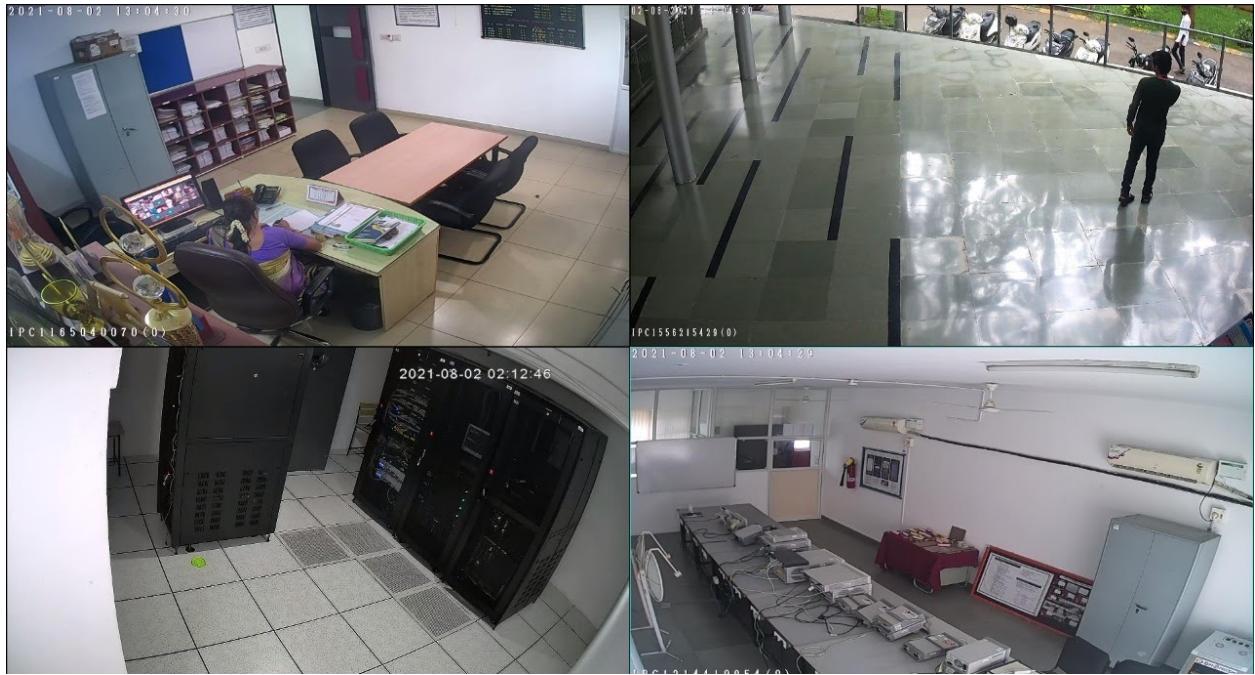

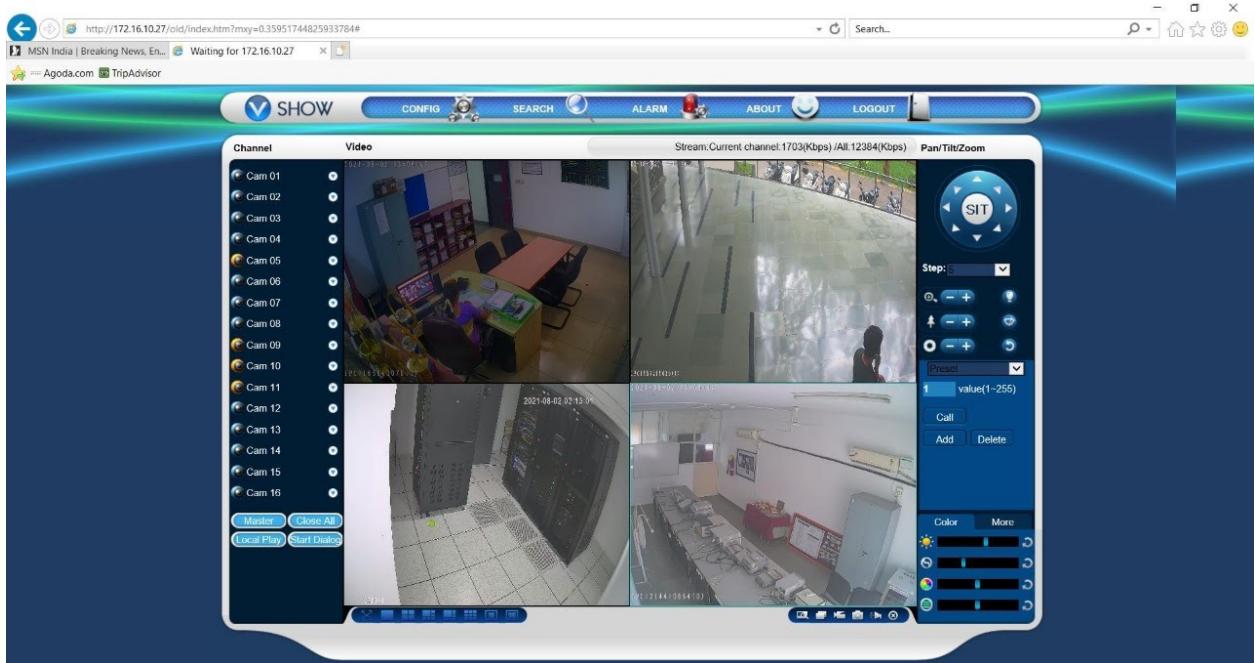

Step 11 : Repeat Step 7 by selecting a high resolution with four streams at a time.

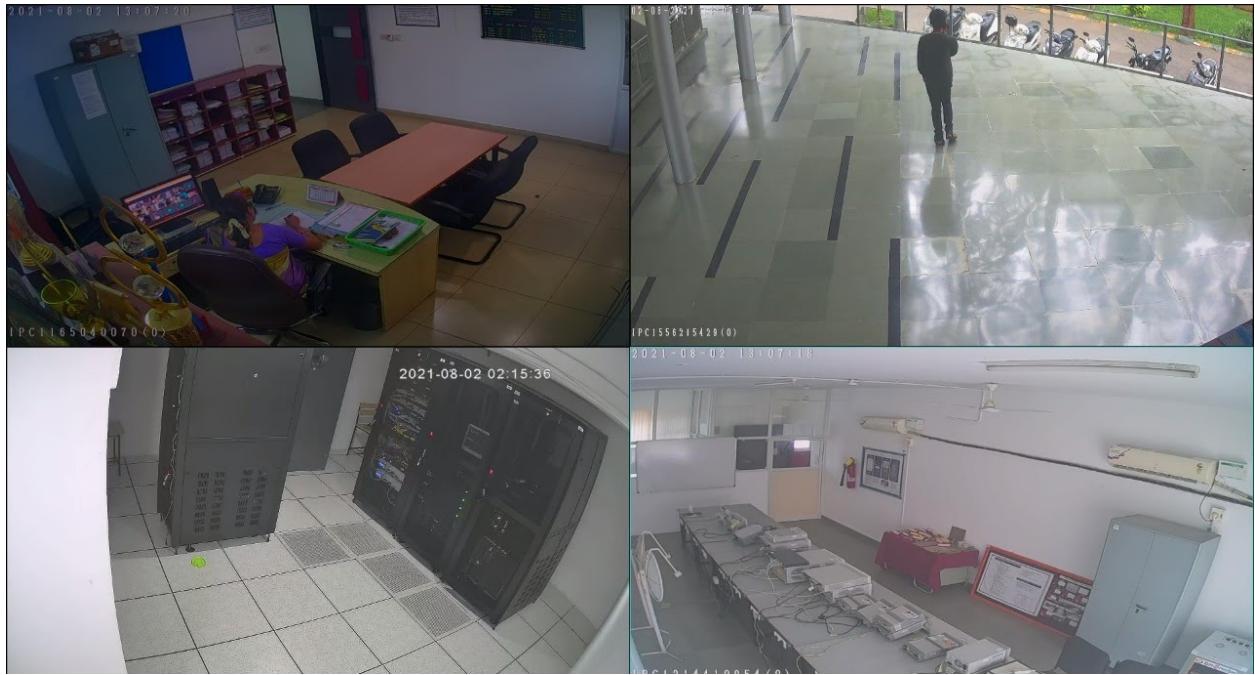

Step 12 : Repeat Step 7 by selecting a low resolution with four streams at a time.

Conclusion

By this experiment we can conclude that Com-Sur's live capturing works great with different streams and resolutions.
